HIGH LOFT 3 LAYER MEDIA

Multi-Wedge 95 media acts as two filters in one. The yellow air entering media stops and retains larger particles. The center micro fine fiber media traps fine particulate. 96% effective on particles in the 1 to 3 micron range.

DURABILITY - SELF-SUPPORTING

Pockets stay erect at any air flow. Heat seal perimeter edges and internal dividers eliminate the concern of dust leakage. Synthetic media is unaffected by moisture.

NO MICROBIAL GROWTH ON THE FILTER

Spor-Ax is a proven, highly effective biocide that controls the growth of mold, mildew, algae and fungi on the media. No premature filter failure from visible growth or an increase in resistance from mold in the media.
