

S-1000 FX GX

Combination UV & FILTRATION 95%

The S1000FX is a air purifier combination Ultraviolet + Filter. The S1000FX can be used in applications ranging from hospital clean room, (for biological treatment) to smoking environments and garbage room odor treatment.

In addition to the patented Sanuvox UV process, the S1000FX Clean Room option is equipped with two 30 inch UV "J" Lamps (one Germicidal UVC Lamp and one Germicidal / Oxidizing UVC / UVV Lamp) for complete biological and chemical protection. Up to four 30"UV "J" Lamps can be incorporated into the S1000FX. The Clean Room option includes also a 99.97% HEPA Filter, which will trap particles down to 0.3 microns (1 / 75000 of an inch) in size.

The S1000FX can be used as a stand-alone system, or installed into the existing ventilation system as a by-pass installation.

4 inches 95% filter supplied
(Optional HEPA 99.97%)
